

Day 8: Multi-view spatiotemporal alignment pretraining — REAL LIBERO + SigLIP

Real LIBERO RLDS (200 ep $\times$ 4 suite, 6000 samples) +
frozen SigLIP-so400m (427M, from OpenVLA-7B)
batch=128, 10 epochs, AdamW + cosine LR

Cosine LR schedule + L_{mva} / L_{tc} decoupling
(L_{mva} harder = cross-view; L_{tc} easier = temporal nearby)
